SKILLS

- Python
- AI
- Machine Larning
- MySQL
- Data Analysis
- C
- C++
- Java
- HTML/CSS/JavaScript
- Excel

SOFT SKILLS

- Communication skills
- Teamwork
- Adaptability
- Problem Solving
- Creativity

EDUCATION

2023-2026

BACHELOR OF COMPUTER APPLICATION

- DCRUST University Murthal
- CGPA : 7.7

CLASS 12 (CBSE)

- Vedantic International School
- 70.8%

CLASS 10 (CBSE)

- Mahashay Jaychand Memo Public School
- 65.2%

PROFILE

- Enthusiastic and hardworking individual with good analytical and communication skills. Quick learner with a strong interest in research, problem-solving, and gaining practical experience. Looking forward to learning and contributing in a professional work environment.

PROJECTS

Customer Churn Analysis Dashboard

Technologies: Python, Pandas, SQL, HTML, CSS, Excel/CSV

- Analyzed 7,043 telecom customer records to identify churn patterns and high-risk customer segments.
- Cleaned raw CSV data using Python and created analysis-ready datasets for reporting.
- Used SQL queries to analyze churn by contract type, tenure, payment method, and internet service.
- Built a dashboard showing 26.54% churn rate and key churn drivers to support retention decisions.

Spam Mail Detection using Machine Learning

Technologies: Python, ML, NLP

- Built a model to classify emails as spam or not.
- Applied text preprocessing and feature extraction.
- Improved accuracy using machine learning techniques.

Online Examination System

Technologies: Java, Jakarta Servlets, JDBC, MySQL, HTML, CSS, JavaScript, Apache Tomcat

●Built a web-based examination platform with role-based access for admin, examiner, and student users.

●Implemented exam creation, question management, student assignment, submissions, scoring, and result tracking.

●Integrated MySQL persistence using JDBC with normalized tables for users, exams, questions, assignments, and submissions.

ProductivePro – Task Manager

Technologies: HTML, CSS, JavaScript

- Built a responsive task manager to add, delete, and track tasks.
- Implemented filters (All, Active, Completed) with real-time updates.
- Added task statistics and “Clear Completed” feature for better productivity.

Weather Forecast App

Technologies: HTML, CSS, JavaScript, OpenWeatherMap API

- Developed a weather app providing real-time data using API integration.
- Displayed temperature, humidity, wind speed, and pressure.
- Added geolocation and responsive design for all devices.

NewsHub – Personalized News Website

Technologies: HTML, CSS, JavaScript, LocalStorage, News API

- Created a news platform fetching live articles via News API.
- Implemented login, bookmarks, and personalized categories.
- Designed responsive UI with dark mode support
